

IN THE DRAWINGS

Please replace the drawings with the new drawings that are attached to this Amendment.

REMARKS

The Examiner has objected to the drawings and new drawings are attached to this Amendment. The plastic material is shown by alternating thick and thin lines. For this reason, it is requested that this objection be withdrawn.

The informalities noted in paragraph 3 of the Office Action have been corrected by this Amendment.

Claims 13-19 have been rejected under 35 U.S.C. §112, first and second paragraphs because of the phrase which describes that the material forming the outer body penetrates into itself.

Reconsideration is requested in view of this Amendment.

Claim 13 has been amended to recite that the "material that forms the outer body and penetrates into said holes of said outer cover and forms an inner portion of said cover". This amendment is supported by the specification at page 5, lines 2-6, where it was disclosed that "The cover 6 of the inner body 2 is advantageously provided with holes 10 for allowing the outer body forming material to penetrate therethrough, said outer body thereby also forming an inner portion of the cover 6". The quoted language points out that the material forming the outer body penetrates into the inner body through holes 10, which are shown in Fig.3, and forms an inner portion of cover 6. This amendment clarifies what was claimed in original claim 10 and does not raise any new issue. For these reasons, it is requested that the rejections for lack of enablement and indefiniteness be withdrawn as the original specification is enabling for the

subject matter that is explicitly pointed out in the claims.

An early and favorable action is earnestly solicited.

Respectfully submitted,

James V. Costigan
